

CONTENTS

M. A. D. Aguiar, A. P. S. Dias, M. Golubitsky and M. C. A. Leite Homogeneous coupled cell networks with S_3 -symmetric quotient	xxx
Goro Akagi and Kazumasa Suzuki On a certain degenerate parabolic equation associated with the infinity- Laplacian	xxx
Onur Alp İlhan Solvability of Some Volterra Type Integral Equations in Hilbert Space	xxx
Jehad O. Alzabut A Necessary and Sufficient Condition for the Existence of Periodic Solutions of Lin- ear Impulsive Differential Equations with Distributed Delay	xxx
Claudia Anedda and Giovanni Porru Second Order Estimates for Boundary Blow-Up Solutions of Elliptic Equations	xxx
Lorenzo Arona and Josep J. Masdemont Computation of Heteroclinic Orbits between Normally Hyperbolic Invariant 3- Spheres foliated by 2-Dimensional Invariant Tori in Hill's Problem	xxx
Boris P. Belinskiy Optimal design of an optical length of a rod with the given mass	xxx
Boris P. Belinskiy and Peter Caithamer Energy Estimate for the Wave Equation Driven by a Fractional Gaussian Noise	xxx
Luca Biasco and Laura Di Gregorio Periodic solutions of Birkhoff–Lewis type for the nonlinear wave equation	xxx
M. Bonforte and G. Grillo Singular evolution on manifolds, their smoothing properties, and Sobolev inequali- ties	xxx
B. Bonnard, J.-B. Caillau and E. Trélat Second Order Optimality Conditions with Applications	xxx
Abdelkader Boucherif Positive Solutions of Second Order Differential Equations with Integral Boundary Conditions	xxx
J. Burke and E. Knobloch Normal Form for Spatial Dynamics in the Swift-Hohenberg Equation	xxx
Carmen Calvo-Jurado, Juan Casado-Diaz and Manuel Luna-Laynez Parabolic problems with varying operators and Dirichlet and Neumann boundary conditions on varying sets	xxx
E. Calzolari, R. Filippucci and P. Pucci Dead cores and bursts for p -Laplacian elliptic equations with weights	xxx
M. T. Cao, C. Moreno and P. Quintela Numerical Solution of a Time-Dependent Signorini Contact Problem	xxx
Gilles Carbou and Bernard Hanouzet Relaxation approximation of the Kerr Model for the Impedance initial-boundary value problem	xxx
Siegfried Carl	

Comparison Results for a Class of Quasilinear Evolutionary Hemivariational Inequalities	xxx
A. N. Carvalho and J. W. Cholewa	
Strongly damped wave equations in $W_0^{1,p}(\Omega) \times L^p(\Omega)$	xxx
Yaw Chang and Lin Chen	
Solve the Vehicle Routing Problem with Time Windows via a Genetic Algorithm	xxx
A. Chauviere, T. Hillen and L. Preziosi	
Modeling the Motion of a Cell Population in the Extracellular Matrix	xxx
Raffaele Chiappinelli	
Eigenvalues of homogeneous gradient mappings in Hilbert space and the Birkhoff-Kellogg Theorem	xxx
J. A. Conejero and A. Peris	
Chaotic Translation Semigroups	xxx
Eduardo Cuesta	
Asymptotic behaviour of the solutions of fractional integro-differential equations and some time discretizations	xxx
Claire David and Pierre Sagaut	
Theoretical optimization of finite difference schemes	xxx
R. Denk and L. R. Volevich	
A new class of parabolic problems connected with Newton's polygon	xxx
Laurent Desvillettes and Klemens Fellner	
Entropy Methods for Reaction-Diffusion Systems: Degenerate Diffusion	xxx
J. I. Díaz and J. F. Padial	
On a free-boundary problem modeling the action of a limiter on a plasma ...	xxx
Bernard Ducomet	
Asymptotics for 1D Flows with Time-Dependent External Fields	xxx
M. Efendiev, E. Nakaguchi and W. L. Wendland	
Uniform estimate of dimension of the global attractor for a semi-discretized chemotaxis-growth system	xxx
Michela Eleuteri	
An existence result for a P.D.E. with hysteresis, convection and a nonlinear boundary condition	xxx
Fatone, Mariani, Recchioni and Zirilli	
Pricing realized variance options using integrated stochastic variance options in the Heston stochastic volatility model	xxx
Wei Feng	
Dynamics in 3-Species Predator-Prey Models with Time Delays	xxx
Wenyong Feng, Guang Zhang and Yikang Chai	
Existence of Positive Solutions for Second Order Differential Equations Arising from Chemical Reactor Theory	xxx
Zhaosheng Feng	
Traveling Waves to A Reaction-Diffusion Equation	xxx
Xilin Fu and Zhang Chen	
New discrete analogue of neural networks with nonlinear amplification function and	

its periodic dynamic analysis	xxx
Takesi Fukao and Masahiro Kubo	
Nonlinear degenerate parabolic equations for a thermohydraulic model	xxx
Leszek Gasiński	
Existence Results for Quasilinear Hemivariational Inequalities at Resonance ..	xxx
D. J. Georgiev, A. J. Roberts and D. V. Struin	
Nonlinear Dynamics on Centre Manifolds Describing Turbulent Floods:	
<i>k</i> - ω Model	xxx
Jacques Giacomoni and Konijeti Sreenadh	
Multiplicity Results for a Singular and Quasilinear Equation	xxx
Julijana Gjorgjieva and Jon Jacobsen	
Turing Patterns on Growing SpheresS: The Exponential Case	xxx
M. T. González Montesinos and F. Ortegón Gallego	
The Thermistor Problem with Degenerate Thermal Conductivity and Metallic Con-	
duction	xxx
E. V. Grigorieva and E. N. Khailov	
Optimal control of a nonlinear model of economic growth	xxx
François Hamel, Nikolai Nadirashvili and Emmanuel Russ	
Comparisons of Eigenvalues of Second Order Elliptic Operators	xxx
Takahiro Hashimoto	
Nonexistence of Global Solutions of Nonlinear Schrödinger Equations in Non Star-	
Shaped Domains	xxx
Julien Jimenez	
Scalar Conservation Law with Discontinuous Flux in a Bounded Domain	xxx
Nikos I. Karachalios and Athanasios. N. Lyberopoulos	
On the dynamics of a degenerate damped semilinear wave equation in \mathbb{R}^N : the	
non-compact case	xxx
Anna Karczewska and Carlos Lizama	
On stochastic fractional Volterra equations in Hilbert space	xxx
Guy Katriel	
Existence of periodic solutions for enzyme-catalysed reactions with periodic sub-	
strate input	xxx
Billur Kaymakçalan, Raziye Mert, and Ağacık Zafer	
Asymptotic equivalence of dynamic systems on time scales	xxx
Paula Kemp	
Fixed Points and Complete Lattices	xxx
Eun Heui Kim	
Boundary gradient estimates]Boundary gradient estimates for subsonic solutions of	
compressible transonic potential flows	xxx
S. S. Krigman	
Exact Boundary Controllability of Maxwell's Equations with Weak Conductivity in	
the Heterogeneous Medium Inside a General Domain	xxx
M. Kubo and N. Yamazaki	
Periodic Stability of Elliptic-Parabolic Variational Inequalities with Time-Dependent	
Boundary Double Obstacles	xxx

Laurent Lévi and Julien Jimenez	
Coupling of Scalar Conservation Laws in Stratified Porous Media	xxx
K. Q. Lan and G. C. Yang	
Optimal Constants for Two Point Boundary Value Problems	xxx
Monica Lazzo and Paul G. Schmidt	
Nodal Properties of Radial Solutions for a Class of Polyharmonic Equations ..	xxx
F. J. Lin	
Hamiltonian dynamics of atom-diatom molecule complexes and collisions ...	xxx
Jing Liu, Xiaodong Liu, Sining Zheng and Yanping Lin	
Positive Steady State of a Food Chain System with Diffusion	xxx
Julián López-Gómez	
Uniqueness of radially symmetric large solutions	xxx
Bendong Lou	
Traveling Wave Sol. of a Generalized Curvature Flow Eq. in the Plane	xxx
To Fu Ma	
Positive Solutions for a Nonlocal Fourth Order Equation of Kirchhoff Type ..	xxx
Monica Marras and Stella Vernier Piro	
Blow Up and Decay Bounds in Quasi Linear Parabolic Problems	xxx
Nora Merabet	
Global convergence of a memory gradient method with closed-form step size for-	
mula	xxx
S. Migórski and A. Ochal	
Navier–Stokes problems modeled by evolution hemivariational inequalities ...	xxx
Piotr B. Mucha	
Limit of Kinetic Term for a Stefan Problem	xxx
Dimitri Mugnai	
Almost uniqueness result for reversed variational inequalities	xxx
Jiří Neustupa	
On L^2 -Boundedness of a C_0 -Semigroup Generated by the Perturbed Oseen–Type	
Operator Arising from Flow Around a Rotating Body	xxx
C. V. Nikolopoulos and G. E. Zouraris	
Numerical solution of a non-local elliptic problem modeling a thermistor with a	
finite element and a finite volume method	xxx
Chadi Nour	
Construction of solutions to a global eikonal equation	xxx
Toshi Ogawa	
Degenerate Hopf instability in oscillatory reaction-diffusion equations	xxx
Mario Ohlberger and Ben Schweizer	
Modelling of interfaces in unsaturated porous media	xxx
Panos K. Palamides and Alex P. Palamides	
Singular boundary value problems, via Sperner’s Lemma	xxx
I. Pawłó and W. M. Zajączkowski	
Regular weak solutions to 3–D Cahn–Hilliard system in elastic solids	xxx
Lukáš Poul	

Existence of weak solutions to the Navier–Stokes–Fourier system on Lipschitz domains	xxx
Marilena N. Poulou and Nikolaos M. Stavrakakis	
Global Attractor for a Klein-Gordon-Schrödinger Type System	xxx
Andrejs Reinfelds and Klara Janglajew	
Reduction principle in the theory of stability of difference equations	xxx
Frédéric Robert	
On the influence of the Kernel of the bi-harmonic operator on fourth order equations with exponential growth	xxx
Yuri V. Rogovchenko and FatoşTuncay	
Interval Oscillation of a Second Order Nonlinear Differential Equation with a Damping Term	xxx
Tomáš Roubíček	
Modelling of Thermodynamics of Martensitic Transformation in Shape-Memory Alloys	xxx
Hironobu Sasaki	
Remark on the scattering problem for the Klein-Gordon equation with power nonlinearity	xxx
Ian Schindler and Kyril Tintarev	
Mountain pass solutions to semilinear problems with critical nonlinearity	xxx
Andrey E. Shishkov	
Waiting Time of Propagation and the Backward Motion of Interfaces in Thin-Film Flow Theory	xxx
Ken Shirakawa	
Solvability for phase field systems of Penrose-Fife type associated with p -Laplacian diffusions	xxx
J. Su, H. Perez and M. He	
Regular Bursting Emerging From Synaptically Coupled Neurons	xxx
Dong Sun, V. S. Manoranjan and Hong-Ming Yin	
Numerical Solutions for a Coupled Parabolic Equations Arising induction Heating Processes	xxx
Shingo Takeuchi	
Partial Flat Core Properties Associated to the p -Laplace Operator	xxx
Kyril Tintarev	
Positive Solutions of Elliptic Equations with a Critical Oscillatory Nonlinearity xxx	
M. D. Todorov and C. I. Christov	
Conservative Numerical Scheme in Complex Arithmetic for Coupled Nonlinear Schrödinger Equations	xxx
Roberto Triggiani	
Sharp Regularity of Hyperbolic-Dominated Thermoelastic Systems with Point Control: The Clamped Case	xxx
T. L. van Noorden, I. S. Pop and M. Röger	
Crystal dissolution and precipitation in porous media: L^1 -contraction and uniqueness	xxx
Joachim von Below and Gaëlle Pincet Mailly	

Blow up for some nonlinear parabolic problems with convection under dynamical boundary conditionsxxx
Patricia J. Y. Wong
On the Existence of Fixed-Sign Solutions for a System of Generalized Right Focal Problems with Deviating Argumentsxxx
Xiao-Dong Yang and Roderick V. N. Melnik
Accounting for the Effect of Internal Viscosity in Dumbbell Models for Polymeric Fluids and Relaxation of DNAxxx
Inara Yermachenko and Felix Sadyrbaev
Types of Solutions and Multiplicity Results for Second Order Nonlinear Boundary Value Problemsxxx
