Networks & Heterogeneous Media

ISSN 1556-1801
eISSN 1556-181X
2021 IF: 1.410

About Journal

Networks & Heterogeneous Media (NHM) offers a strong combination of three features: Interdisciplinary character, specific focus, and deep mathematical content. Also, the journal aims to create a link between the discrete and the continuous communities, which distinguishes it from other journals with strong PDE orientation. NHM publishes original contributions of high quality in networks, heterogeneous media and related fields. NHM is thus devoted to research work on complex media arising in mathematical, physical, engineering, socio-economical and bio-medical problems.

- NHM is a quarterly publication.
- It is indexed in SCIE, Mathematical Reviews/MathSciNet, Scopus, zbMATH Open, Ei Compendex and more.

Editors In Chief
