When an institution signs up for Read & Publish with AIMS, authors based there can freely publish gold open access in any of our high-quality, traditional journals as part of the agreement. It also gives the institution perpetual access rights to content from our entire journal portfolio, and supports the sustainable transition to open access publishing.

**Steps to Publishing Open Access under Read & Publish**

1. Author Submits a paper
2. Paper is accepted (after the peer-review process)
3. We recognize corresponding authors by email domain
4. We let the author know they can publish OA via their institution’s Read & Publish agreement
5. Paper is published OA
6. Annual reports are provided to each institution showing the OA articles

**What is Read & Publish?**

When an institution signs up for Read & Publish with AIMS, authors based there can freely publish gold open access in any of our high-quality, traditional journals as part of the agreement. It also gives the institution perpetual access rights to content from our entire journal portfolio, and supports the sustainable transition to open access publishing.

Contact general@aimsciences.org if your university wishes to make a Read & Publish agreement.
