About Journal

Mathematical Foundations of Computing (MFC) provides an interdisciplinary forum to promote interaction among mathematicians, computer scientists and statisticians as well as engineers to exchange new ideas and techniques for attacking the pressing challenges in data analysis. The journal aims to provide a place for more understanding and transparency of data analytics in different areas of AI. We welcome high-quality papers in all areas of AI related to the computational and algorithmic aspects of data analysis, with emphasis on innovative theoretical development, methods, and algorithms including, but not restricted to, machine learning, deep learning, and learning theory.

- MFC is a quarterly publication.
- It is indexed in ESCI, Scopus, zbMATH Open, Ei Compendex and more.

Editors in Chief

Wan-Quan Liu
